NETSCOUT

OneTouch AT Network Assistant

An all-in-one handheld tester for troubleshooting & validating of ethernet and Wi-Fi networks connectivity, end-to-end path link path and application performance. AutoTest mimics the end-user experience and speeds testing. Automated discovery reveals device attributes. Dual ports simplify inline capture and VoIP monitoring. Companion cloud service with total remote control facilitates collaboration between field team and in-house engineers.

ONETOUCH™ AT KEY ATTRIBUTES INCLUDE:

- Dedicated hardware for Ethernet and Wi-Fi test

- Identification and location of non-802.11 sources, such as Bluetooth and microwave oven

- Verify SLA with path performance testing

- One-button programmable AutoTest(s)

- Wi-Fi or Wired Inline packet capture

- Complementary Link-Live cloud portal for test result storage
